

Finance Officer services & accounting outsourcing within DIFC regulated entities

All regulated entities in the Dubai Financial Services Authority (DSFA) are required to designate a Finance Officer to provide quarterly and year end reporting. Outsourcing this function as well as your monthly accounting often is the most cost-effective solution for firms with smaller teams, that do not require a full-time finance professional.

Our qualified accountants and finance managers will ensure your accounts are in order and your company complies with all financial reporting requirements. We can either stand in as the Finance Officer on record, or provide the expert accounting, reporting, and required knowledge to support an internal member of the client team, who is the registered Finance Officer.

At Premier Brains we aim to provide one stop solution to all your finance and accounting concerns.

As an outsourced Accounting and Reporting Services and Support to the Finance Officer, we provide:

- Accounting and Reporting services
- Accounting review
- Calculation and monitoring of capital and Liquidity adequacy
- Quarterly and annual preparation of PIB/PIN reports
- Support the management on the management accounting areas like Budgeting and Business Planning
- Support preparation in monthly Board presentations
- Liaising with the external auditors, internal auditors and regulators
